SENTRIVION (VTOL)

Ultra-Light | Long Endurance | Rapid Deployment

Sentrivion is a next-gen ultra-light VTOL UAV built for long endurance, rapid deployment, and advanced autonomy. Designed for surveillance, mapping, and specialized missions, it delivers uncompromised performance across industries and security domains.

AI Vision Model

Automated threat recognition and alert - Alerts for you, not endless video

24X7

long range precision
surveillance with
automated target tracking

DAYLIGHT HD

1280 x 720

PX Camera

Day Surveillance Payload

THERMAL

640 x 480

PX Camera

with 30X Hybrid Zoom

Night Surveillance Payload

Survey Camera (Mapping)

Thermal Camera

Fast Payload Replacement: < 5 minutes

FLY 24/7 - SECURE 24/7

24x7 automated docking for charging, protection, and instant deployment.

Rapid battery swap & recharge

Weather-proof housing (IP-rated)

Zero downtime, continuous operations

AI DETECTS - YOU GET ALERTS

AI-powered vision that doesn't just see, but understands

Real-time anomaly & threat detection (fire, intrusion, crowd fights, theft, abandoned objects)

Custom alerts & instant operator notifications

Continuous learning and upgradeable modules

PILOTLESS DRONE FLIGHT - FULLY AUTONOMOUS

Homegrown ground control platform for full mission independence.

Encrypted communication & local video storage

Intuitive waypoint navigation & mission planning

Seamless integration with security networks and third-party systems

PAWAAC
Drones

FEATURES

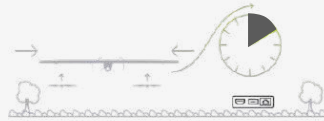

PAWAAC
Drones

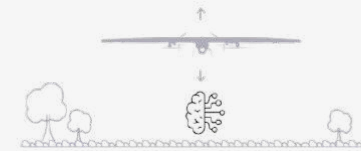

No Pilot Needed to operate

Draw a line, click "Go," and the drone monitors autonomously

Operate Drone 24/7

24x7 automated docking for charging, protection, and instant deployment.

Next-Generation AI Vision

Sentrivion's AI vision analyzes live video in real time autonomously.

Encrypted Communication

Secure GCS-UAV communication; videos streamed and stored locally.

Target Detection at Over 1 km SLR

5°C to +45°C - Operate with confidence in diverse climates

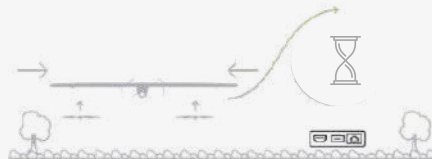

Certified to operate between 5°C to +45°C

Operate with confidence in diverse climates

Best in Class Area Coverage

Mission Area of over 700 Square Kilometers available from each takeoff point

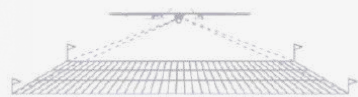

Less than 10 min Deployment Time

User-friendly assembly to conduct surveillance operations faster

VTOL Capable

VTOL allows terrain independence without runways or launch gear.

Robust Build Quality

Switch UAV's airframe is built for over 500 surveillance missions

Man-portable

Up to 100% lighter than other drones in its class

Manual Mode

Take control when needed
